

Full Court Out of Bounds - "Stack"

With only seconds remaining on the game clock, this "Stack" play provides a scoring option off a long pass along with a quick inbounds pass option for a timeout or one-on-one push isolation. The four player stack alignment confuses defenses, and has been proven to be highly successful over the years.

The quickest player takes the ball out of bounds. The player who has the best "arm" to throw the most accurate long pass assumes the first position and the best ball handler the second position of the stack alignment. The other two players are screeners.

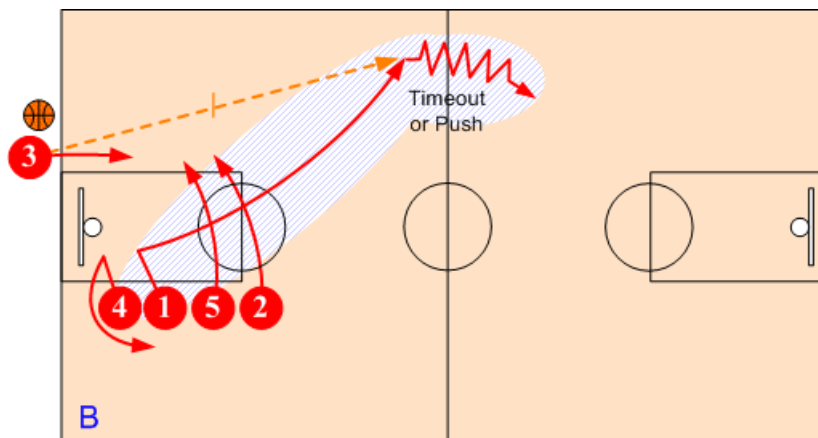

Inbounder Fly Option

O4 steps out of bounds and receives a cross court pass from O3. O5 and O2 move across the three second area creating a double screen for O3 and O1. After making the pass, O3 sprints to the basket for shot. Inbounder O4 leads O3 to the opposite free throw line.

CAUTION: This option can only be ran after an opponent made field goal or free throw.

Time Out or Push Option

Out of the four player stack alignment, O5 and O2 move across three second area and O1 cuts behind their moving screens to midcourt. O3 inbounds the ball to O1 for a quick timeout or to isolate O1 for a quick one-on-one push.
